PROFESSIONAL SUMMARY

Technical Support & Systems Specialist with 2+ years of experience in technical support, system troubleshooting, customer-facing environments, and business applications. Experienced in investigating technical incidents, identifying root causes, and resolving application and system issues. Strong technical background in web applications, REST APIs, SQL Server, databases, and .NET technologies, combined with customer communication, technical documentation, and cross-functional collaboration. Currently pursuing a degree in Computer Engineering.

CORE SKILLS

Technical Support & Systems: Technical Support | Systems Troubleshooting | Application Support | Incident Management | Root Cause Analysis | Ticket Management

Backend & APIs: C# | .NET | REST APIs | API Troubleshooting | Postman

Databases: SQL Server | PostgreSQL | SQL Queries | Stored Procedures | Database Troubleshooting

Web Development: JavaScript | TypeScript | HTML | CSS | React

Tools & Platforms: Git | GitHub | Jira | Docker | Claude Code | OpenAI Codex | | Salesforce CRM | Power BI | Microsoft Excel

PROFESSIONAL EXPERIENCE

ASSET PROTECTION ASSOCIATE

Walmart — Costa Rica

February 2026 – Present

- Investigate operational, inventory, and asset-protection incidents using internal systems, Microsoft Excel, Power BI, and CCTV, helping identify discrepancies, patterns, and potential operational risks.
- Analyze inventory, transaction, and treasury data to determine inconsistencies and possible root causes, providing accurate information to support corrective actions and decision-making.
- Maintain detailed incident records and investigation findings, improving visibility and follow-up across operational processes.
- Collaborate with cross-functional teams to resolve system- and process-related discrepancies while ensuring accurate documentation and compliance with established procedures.

BACK OFFICE ANALYST

Concentrix — Costa Rica

October 2025 – February 2026

- Managed customer cases through internal systems, reviewing account, shipment, and operational data to investigate reported issues and determine appropriate resolution paths.
- Provided support through phone and email, gathering relevant information, troubleshooting service-related problems, and keeping customers informed throughout the resolution process.
- Investigated discrepancies across customer records and internal platforms, coordinating with specialized teams when escalation or additional technical analysis was required.
- Maintained accurate case documentation and consistent follow-up on pending requests, helping ensure continuity between customers and internal departments.

FULL STACK DEVELOPER

DNAMIC — Costa Rica

April 2024 – May 2025

- Investigated and resolved application, API, database, and internal system incidents, identifying root causes across different system layers and implementing reliable solutions to minimize operational disruption.
- Developed and maintained business and web applications using .NET, C#, Visual Basic, REST APIs, SQL Server, HTML, CSS, and JavaScript, supporting both new requirements and existing system functionality.
- Designed, maintained, and optimized SQL queries, stored procedures, views, and database logic, improving data reliability, application behavior, and system performance.
- Troubleshoot issues across frontend, backend, API, and database layers, allowing reported problems to be analyzed beyond surface-level symptoms and resolved more effectively.
- Collaborated directly with clients, users, and development teams to gather requirements, reproduce reported issues, validate solutions, and coordinate system improvements from initial request through implementation.
- Supported application maintenance and continuous improvement by combining software development knowledge with technical troubleshooting and customer-facing support.

EDUCATION

Bachelor's Degree in Computer Engineering — In Progress

Universidad Estatal a Distancia (UNED) — Costa Rica

2025 – Present

Technical Diploma in Computing and Information Technology

Universidad Estatal a Distancia (UNED) — Costa Rica

2024

CERTIFICATIONS

- Introduction to IoT — Cisco Networking Academy
- Introduction to Cybersecurity — Cisco Networking Academy
- Microsoft Office Certification — Colegio Experimental Bilingüe de Belén, Costa Rica
- English Language Certification — University of Costa Rica (UCR)

LANGUAGES

- Spanish – Native
- English – Intermediate (B1+)
