PROFESSIONAL SUMMARY

Full Stack Developer & IT Support Specialist with 2+ years of experience developing and maintaining business applications, troubleshooting production systems, and resolving technical incidents in corporate environments. Experienced across frontend, backend, databases, REST APIs, and application support using .NET, C#, SQL Server, React, JavaScript, and PostgreSQL. Skilled in root cause analysis, CI/CD workflows, Jira, version control, and AI-assisted development tools. Currently pursuing a degree in Computer Engineering.

CORE SKILLS

Software Development: C# | .NET | ASP.NET | REST APIs | JavaScript | TypeScript | React | HTML | CSS | Bootstrap | Tailwind

Technical Support & Systems: Application Support | Systems Troubleshooting | Incident Management | Root Cause Analysis | Ticket Management | Production Support

IT Infrastructure & Networking: Windows Server | Active Directory (AD DS) | Group Policy (GPO) | DNS | DHCP | TCP/IP | Network Troubleshooting | VPN | User & Access Management

Databases: SQL Server | PostgreSQL | SQL | Stored Procedures | Database Troubleshooting | Firebase

DevOps & Tools: Git | GitHub | CI/CD | Jira | Docker | Postman | VPN | Claude Code | OpenAI Codex

Business & Analytics: Power BI | Microsoft Excel | Salesforce CRM

PROFESSIONAL EXPERIENCE

ASSET PROTECTION ASSOCIATE

Walmart — Costa Rica

February 2026 – September 2026

- Investigated operational, inventory, and asset-protection incidents using internal systems, Microsoft Excel, Power BI, and CCTV to identify discrepancies and potential risks.
- Analyzed inventory shortages, overages, and treasury records, supporting root-cause identification and corrective actions.
- Coordinated cross-functional investigations, documented findings, and supported the resolution of operational, security, and compliance issues.
- Collaborate with cross-functional teams to resolve system- and process-related discrepancies while ensuring accurate documentation and compliance with established procedures.

BACK OFFICE ANALYST

Concentrix — Costa Rica

October 2025 – February 2026

- Managed customer cases through internal systems, reviewing account, shipment, and operational data to investigate reported issues and determine appropriate resolution paths.
- Provided support through phone and email, gathering relevant information, troubleshooting service-related problems, and keeping customers informed throughout the resolution process.
- Investigated discrepancies across customer records and internal platforms, coordinating with specialized teams when escalation or additional technical analysis was required.
- Reviewed customer and operational data using internal systems and AI-assisted tools to identify discrepancies, accelerate information analysis, and support accurate case resolution.
- Maintained accurate case documentation and consistent follow-up on pending requests, helping ensure continuity between customers and internal departments.

FULL STACK DEVELOPER

DNAMIC — Costa Rica

April 2024 – May 2025

- Developed, maintained, and enhanced enterprise web applications using .NET, C#, VB.NET, ASP.NET Web Forms, SQL Server, JavaScript, HTML, CSS, Bootstrap, and jQuery.
- Investigated and resolved application, database, and production issues through troubleshooting and root-cause analysis, minimizing operational disruption.
- Designed and optimized SQL queries, stored procedures, and database objects to improve application performance and data reliability.
- Supported production deployments, hotfixes, and environment maintenance, connecting securely to corporate servers through VPN and participating in CI/CD and version-control workflows.
- Managed technical requirements and incidents through Jira, collaborating with users, development, support, and infrastructure teams to deliver and validate solutions.

SELECTED PROJECTS

SMART ENERGY — Full-Stack Energy Monitoring Platform

React | TypeScript | ASP.NET Core | C# | PostgreSQL | REST API | JWT

- Developed a responsive full-stack energy monitoring platform with a React frontend, ASP.NET Core REST API, PostgreSQL database, and JWT authentication.
- Implemented device management, energy readings, manual consumption tracking, and ESP32 Bluetooth Low Energy (BLE) integration.
- Deployed the frontend and backend using Vercel and Render.

FORGE FLOW CORE — Business Management Platform

C# | .NET | REST APIs | PostgreSQL | React

- Developed a modular business platform for customers, inventory, quotations, sales, suppliers, expenses, and service management.
- Designed scalable backend architecture and business workflows supporting inventory, sales, invoicing, and operational processes.

EDUCATION

Bachelor's Degree in Computer Engineering — In Progress

Universidad Estatal a Distancia (UNED) — Costa Rica

2025 – Present

Technical Diploma in Computing and Information Technology

Universidad Estatal a Distancia (UNED) — Costa Rica

2024

CERTIFICATIONS

- Introduction to IoT — Cisco Networking Academy
- Introduction to Cybersecurity — Cisco Networking Academy
- Microsoft Office Certification — Colegio Experimental Bilingüe de Belén, Costa Rica
- English Language Certification — University of Costa Rica (UCR)
-

LANGUAGES

- Spanish – Native
- English – Intermediate (B1+)
